TAKEO HOSHI

Professor of Economics,
The University of Tokyo

ULRIKE SCHAEDE

Professor and Director of the
Japan Forum for Innovation and
Technology, GPS UC San Diego

Stagnation, two lost decades, government debt, zombies. And, reform, industrial restructuring, policies to increase Japan's "financial metabolism". What is the current state of the Japanese economy, what are the important metrics to assess it properly, and how should we evaluate the successes of the "Abenomics" reform programs? Join a conversation with Takeo Hoshi about his two new books, "The Japanese Economy" (with Taka Ito) and "The Political Economy of the Abe Government and Abenomics Reforms" (co-edited with Phillip Lipsky).

Takeo Hoshi is a Professor of Economics at the University of Tokyo. He has previously held positions at Stanford University and UC San Diego's School of Global Policy and Strategy, where he was a professor for 24 years. He holds a B.A. from the University of Tokyo, and a Ph.D. in Economics from MIT, and his research specializes on corporate finance, banking regulation, macroeconomic policy and the Japanese economy.
