Camilla BJÖRKEGREN

Visiting Professor, Tokyo College, The University of Tokyo; Professor, Karolinska Institute, Sweden

Commentator

MIYAZONO Kohei

Distinguished University Professor & Special University Professor Emeritus, The University of Tokyo

Lecture

Zoom Webinar

Chromosome Function and Maintenance

Propagating Life

Prof. Björkegren's research focuses on the helical nature of DNA. The lecture will give a background to this analysis, presenting the structure and function of chromosomal DNA and how these features influence cellular growth. This will set the stage for a final discussion on how and if the organization of the hereditary material into a double stranded helix shapes the identity and development of our cells.

2023. 3.10 [Fri.]

4:00pm - 5:30pm

Venue

Zoom Webinar
