World Environment Day “The Lives, Deaths and Afterlives of Plastic: Global Perspectives”

Plastic is essential for so many of the things we value in today's world. But excessive and unplanned use of plastic worsens the conditions driving climate change and threatens the land, the seas and the lives of animals and humans.

Speakers on this panel will highlight issues including the chemical challenges plastic poses for the environment; the lives of waste-pickers who minimize the harm caused by discarded plastic; the science and economics confronting small-scale, local reuse of plastic; government mechanisms to coordinate the containment of plastic; and the dangers to animals and humans of micro-plastics in diverse forms.

2023. 6. 5 [Mon.]
5:00pm - 7:00pm JST

Speaker 1

**Robin
JEFFREY**

Professor, National University of Singapore

Speaker 2

**Assa
DORON**

Professor, Australian National University

Speaker 3

**Aparna
AGARWAL**

Researcher, University of Oxford

Speaker 4

**Anish
MALPANI**

Founder, WITHOUT by Ashaya

Speaker 5

NAKATANI Jun

Professor, The University of Tokyo

Moderator

**Trent
BROWN**

Associate Professor, Tokyo College

Language

English with Japanese simultaneous translation
