Carbon Border Adjustment:
Progress or Peril?

The European Union is about to implement the world’s first carbon border adjustment mechanism: a charge on imports from countries with lower carbon prices. Advocates see this as a major advance in the fight against climate change. Opponents see it as opening the door to protectionism. What are the arguments and evidence? Should other countries do the same?

2023. 5.15 [Mon.]
5:00 pm - 6:30 pm JST

Michael KEEN
Ushioda Fellow,
The University of Tokyo

KAMEYAMA Yasuko
Professor, Graduate School of Frontier Sciences, The University of Tokyo

Trent BROWN
Associate Professor, Tokyo College, The University of Tokyo
