Thinking through Permafrost

Permafrost seems to have gained 'sudden' global visibility as various parties appear invested in preventing its deterioration. But where was permafrost before? In this lecture, Prof. Dullin will discuss how Permafrost was invented as a scientific issue, while also being a natural and meaningful ground for the native communities living on it. Then, she will show how Permafrost took, at the turn of the 21st century, a political meaning in the search for sovereignty in different Arctic substates, such as Yakutia.

2024. **5.14** [Tue.]
16:30-18:00 JST

Speaker

**Sabine
DULLIN**

Professor,
Department of History,
Sciences Po Paris

Commentator

**SUGIYAMA
Masahiro**

Professor,
Institute for Future Initiatives,
The University of Tokyo

Moderator

**SHIMAZU
Naoko**

Professor, Tokyo College,
The University of Tokyo

Venue

Zoom Webinar

Language

English (Japanese interpretation)
