Webinar

Ecosophy: Multiple Perspectives and Its Roles in Planetary Health

Achieving planetary health requires not only scientific solutions but also fundamental cultural and behavioral transformations. This lecture will present a comprehensive approach that addresses both individual values and social systems. Through examples from Japan and Scandinavia, it emphasizes the importance of integrating eco-sophy—ecological philosophy—into policy and societal frameworks. Furthermore, it highlights the crucial roles of non-state actors, including NGOs and academic institutions involved in the water and energy sectors, alongside governments, in addressing climate change challenges.

2025. **7.11** [Fri.]
10:30–12:00 JST

Speaker

**Zaini
Ujang**

Former Secretary
General of
the Ministry of Energy,
Green Technology
and Water, Malaysia
