Webinar

Changing the Urban Food Environment to Reduce Risk of Chronic Disease

This presentation will describe environmental interventions to prevent obesity and non-communicable diseases in urban food environments. Dr. Gittelsohn will highlight strategies, impacts and lessons learned from the Baltimore Healthy Food initiatives, as well as the work of other researchers. Evidence shows that combining educational, environmental, and policy approaches improves access to and consumption of healthier foods, though impacts on obesity remain modest. His current work explores digital tools, restaurant and systems science approaches. Findings underscore the need for sustainable, community-engaged strategies to strengthen food environments and reduce chronic disease risk.

Lecturer

**Joel
GITTELSON**

Invited Professor,
Tokyo College,
The University of Tokyo;
Professor,
Johns Hopkins University

Commentator

**INADA
Haruhiko**

Associate Professor,
Graduate School of Medicine,
The University of Tokyo

Moderator

OSHIMA Marie

Deputy Director,
Tokyo College,
The University of Tokyo

2025. 10.8 [Wed.]
15:00–16:00 JST

Organized by

Tokyo College, The University of Tokyo Institutes for Advanced Study

Language

English (Japanese interpretation)
